ZenData | Automated Data Cleaning Platform

STATUS: DIRTY / UNCLEANED
Target: FinSight Lanka Dataset

INTERVIEW ARTIFACT: Raw uncleaned financial customer records demonstrating automated anomaly detection, deduplication, imputation, and sanitization.

1. Data Health & Anomaly Audit Summary

Overall Quality	Completeness	Uniqueness	Validity	Consistency
92.3% (Grade A-)	97.5%	90.9%	78.8%	98.5%
Penalized by validity & duplicates	5 missing cells out of 198	2 exact duplicate records (9.1%)	7 negative savings balances	1 statistical outlier

2. Flagged Data Hygiene Anomalies (Detected by ZenData)

Severity	Anomaly Type	Affected Field	Impact / Dirty Details	ZenData Automated Remediation
CRITICAL	**Exact Duplicate Records**	Entire Row	**2 duplicate rows:** CUST-1001 (Kasun) and CUST-1003 (Dilshan) repeated	One-click deduplication retains the primary unique instance.
CRITICAL	**Negative Financial Balances**	savings_balance	**7 negative balances:** -2500, -1500, -800, -3200, -500 (savings cannot be < 0)	Sanitize to zero or absolute positive magnitude.
WARNING	**Missing Demographic Data**	age	**2 null values:** Rohan Wickramasinghe, Pooja Ranasinghe missing age	Impute robust statistical median age (26 years).
WARNING	**Missing Financial Balances**	savings_balance	**2 null values:** Sanduni Mendis, Ruwan Dissanayake missing balance	Impute median positive balance across peer risk profile.
INFO	**Missing Income Data**	monthly_income	**1 null value:** Sajith Bandara (Anuradhapura) has blank income	Impute median monthly income (Rs. 58,000).
INFO	**Whitespace & Padding**	city	**4 entries with dirty spacing:** ' Colombo ', ' Colombo'	Automated regex strip removes leading/trailing spaces.

3. Complete Uncleaned Raw Dataset (22 Rows × 9 Columns)

Red highlighted cells indicate dirty values (duplicates, nulls, negative numbers, untrimmed whitespace) detected prior to cleaning.

#	Customer ID	Full Name	Age	Gender	City	Monthly Inc (LKR)	Savings Bal (LKR)	Risk	Status
1	CUST-1001	Kasun Perera	24	Male	' Colombo ' [SPACES]	45,000	-2,500 [NEGATIVE!]	High	Active
2	CUST-1002	Amara Fernando	31	Female	Kandy	85,000	120,000	Low	Active
3	CUST-1003	Dilshan Silva	22	Male	Galle	38,000	-1,500 [NEGATIVE!]	High	Active
4	CUST-1004	Nimali Jayasuriya	45	Female	' Colombo' [SPACES]	110,000	340,000	Low	Active
5	CUST-1005	Rohan Wickramasinghe	MISSING [NULL]	Male	Kurunegala	62,000	85,000	Medium	Active
6	CUST-1006	Thisara Gunaratne	23	Male	' Colombo ' [SPACES]	41,000	0	High	Active
7	CUST-1007	Sanduni Mendis	29	Female	Gampaha	78,000	MISSING [NULL]	Low	Active
8	CUST-1008	Mahesh De Silva	52	Male	Negombo	145,000	680,000	Low	Active
9	CUST-1001 (DUP!)	Kasun Perera	24	Male	' Colombo ' [SPACES]	45,000	-2,500 [NEGATIVE!]	High	Active
10	CUST-1009	Chathurika Alwis	25	Female	Kandy	52,000	-800 [NEGATIVE!]	High	Active
11	CUST-1010	Sajith Bandara	38	Male	Anuradhapura	MISSING [NULL]	190,000	Medium	Active
12	CUST-1011	Anuki Rathnayake	21	Female	Colombo	35,000	12,000	High	Active
13	CUST-1012	Pradeep Senanayake	49	Male	Galle	125,000	410,000	Low	Active
14	CUST-1003 (DUP!)	Dilshan Silva	22	Male	Galle	38,000	-1,500 [NEGATIVE!]	High	Active
15	CUST-1013	Ruwan Dissanayake	23	Male	Jaffna	44,000	MISSING [NULL]	High	Active
16	CUST-1014	Hiruni Cooray	34	Female	Colombo	92,000	215,000	Low	Active
17	CUST-1015	Asanka Fonseka	27	Male	Matara	58,000	64,000	Medium	Active
18	CUST-1016	Kavindi Abeysekara	22	Female	Colombo	40,000	-3,200 [NEGATIVE!]	High	Active
19	CUST-1017	Lasantha Gamage	41	Male	Badulla	73,000	110,000	Medium	Active
20	CUST-1018	Pooja Ranasinghe	MISSING [NULL]	Female	Colombo	88,000	175,000	Low	Active
21	CUST-1019	Nuwan Kulatunga	24	Male	Kandy	46,000	-500 [NEGATIVE!]	High	Active
22	CUST-1020	Dinithi Wijesinghe	30	Female	Kurunegala	81,000	154,000	Low	Active

KEY INTERVIEW TALKING POINTS & DEMO SCRIPT:

• **Problem Statement:** Raw client spreadsheets typically contain silent corruptions: duplicate keys, inverted signs, missing records, and trailing spaces that break relational joins and machine learning pipelines.

• **ZenData Solution:** Drop this file into ZenData (or click 'Load FinSight Demo' on the homepage). ZenData flags a 92.3% health score and categorizes all 6 hygiene issues.

• **One-Click Cleaning:** ZenData deduplicates the dataset (from 22 to 20 clean rows), imputes medians, eliminates negative balances, and strips strings — producing an audit-logged 100% clean dataset ready for export in CSV or Excel.
